Art Unit: 1645

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

### **Election/Restrictions**

- |           |   |
|-----------|---|
| Group I   | Claim 1 is drawn to an inoculating agent for production of fruit bodies of an entomopathogenic fungus, containing hyphal bodies of the entomopathogenic fungus. |
| Group II  | Claims 2-3 are drawn a method of producing an inoculating agent.  |
| Group III | Claim 4 are drawn a spawned insect.   |
| Group IV  | Claims 5-12 are drawn to a method of producing fruit bodies.  |

2. The inventions listed as Groups I-V do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The special technical feature of Group I is an inoculating agent for the production of fruit bodies of an entompathogenic fungus, containing hyphal bodies of the entompathogenic fungus. The special technical feature lacks novelty under PCT Article 33(2) as being anticipated by Mizuno (*International Journal of Medicinal Mushrooms*, Vol. 1, pp. 251-261). Mizuno teaches an inoculating agent, cultured hyphae extracted from *Cordyceps sinensis* (page 259). Group I is the main invention in this application and it lacks novelty, therefore the other claims are not so linked by a special technical feature within the meaning of PCT Rule 13.2 so as to form a single inventive concept. Inasmuch as, the technical feature does not define a contribution over the art, it is not "special" within the meaning of PCT Rule 13.2. Consequently, Groups I, II, III and IV lack unity of invention.
